

CHAD E. FOSTER

NOT JUST A KEYNOTE. AN OPERATING SYSTEM FOR UNCERTAINTY.

Chad E. Foster became a Harvard-educated executive, tech innovator, and billion-dollar dealmaker—building CRM software Oracle said was impossible and leading strategies that delivered industry-leading growth—all after losing his eyesight at 21. As a blind black diamond skier and Brazilian Jiu-Jitsu practitioner, he forged the framework in fire under conditions most executives will never face, which is why it works when your team faces conditions they've never faced.
