

# CHAD E. FOSTER BLIND AMBITION™

HIGH-PERFORMANCE KEYNOTE EXPERIENCE

## High Performance When the Path Isn't Clear

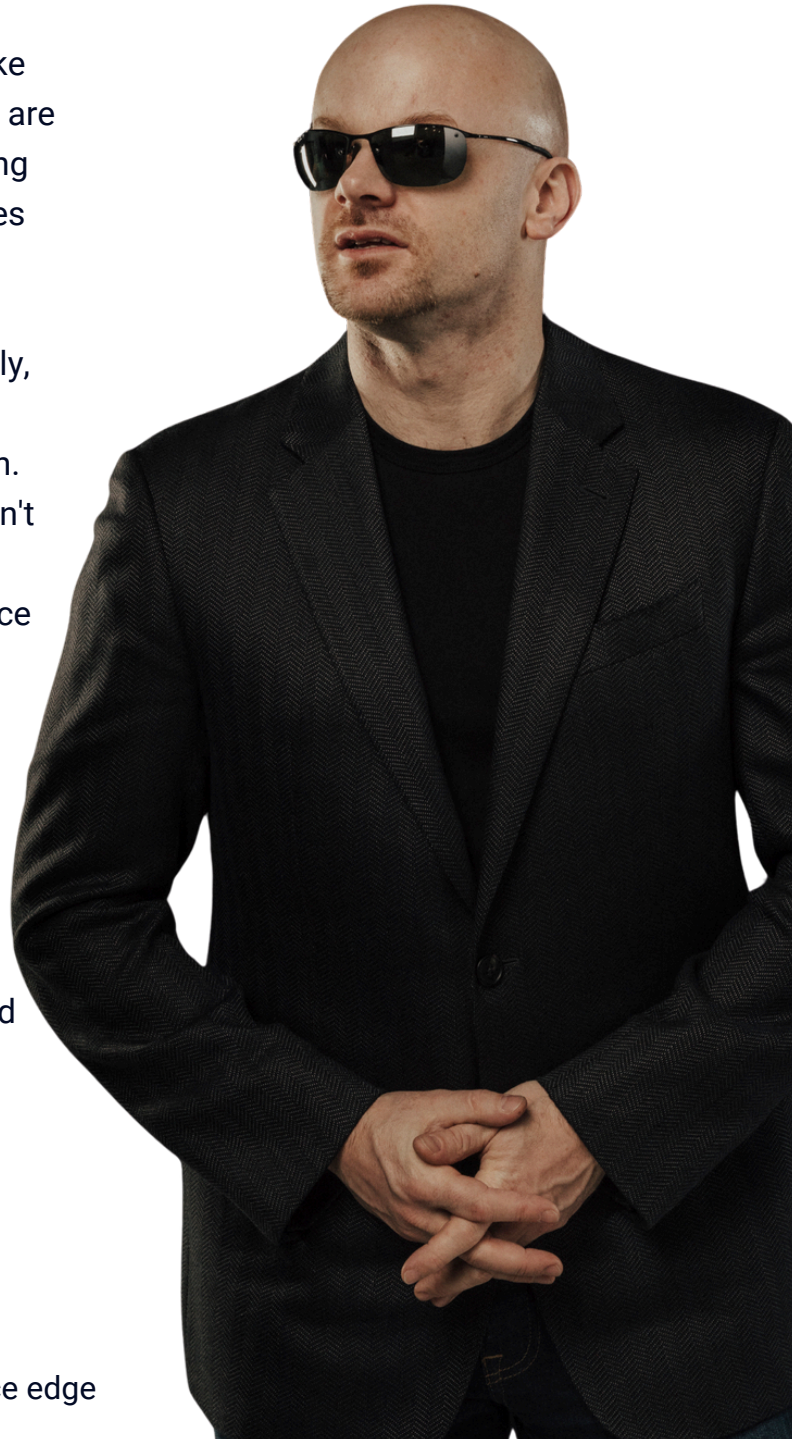

Right now, leaders everywhere are being asked to make high-stakes decisions without clear answers. Markets are shifting. AI is rewriting industries. Teams are navigating constant change while the pace of disruption continues to accelerate.

At 21 years old, Chad Foster lost his eyesight. Suddenly, every decision became uncertain. Every step required reinvention. Waiting for clarity was no longer an option. He had to learn how to perform when conditions weren't ideal—a mindset that eventually helped him become a Harvard-educated executive, build software Oracle once said was impossible, help drive billions in enterprise growth, and ski black diamond mountains completely blind.

Blind Ambition™ is more than a keynote. It's a performance framework for navigating uncertainty, increasing accountability, accelerating adaptability, and performing at a higher level when the path forward isn't clear.

### AUDIENCE TAKEAWAYS

- Increase decision-making velocity during uncertainty
- Replace analysis paralysis with decisive execution
- Build resilience and adaptability during disruption
- Develop ownership and accountability at every level
- Turn adversity, pressure, and change into a performance edge
